Dear Parents/Carers,

Unfortunately, a child in your son's/daughter's class has headlice. As you will know, headlice are extremely common nowadays. We ask that you check your child's hair tonight and treat if necessary. Headlice will infest the heads of other children and members of the family quickly. In order to treat the headlice, we ask that you get advice from your chemist and use a fine headlice comb to remove all of the eggs. We also recommend that you treat the whole family at the same time.

If you need any further advice, please do not hesitate to contact us, or go to the NHS website.

Yours sincerely

R B Hawkins
